Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1   Claim 1 (currently amended): Method of transferring a
2   message stored in a computer arrangement (12) to a mobile
3   device (17(i)), comprising:
4   transmitting an alert message from said computer
5   arrangement (12) to said mobile device (17(i))
6   via a first network (19);
7   transmitting said message stored in said computer
8   arrangement (12) to said mobile device (17(i))
9   upon request from said mobile device (17(i)) via
10   a second network (15);
11   establishing an on-line connection between said
12   computer arrangement (12) and said mobile
13   device (17(i)); and
14   sending said message from said computer
15   arrangement (12) to a protocol translator (14)
16   using a third protocol, translating said message
17   in said third protocol to a message in said
18   second protocol before transmission to said
19   mobile device (17(i));
20   wherein both said first and second networks being
21   parallel mobile networks (15, 19) working in parallel; and
22   wherein said first network (19) is arranged to utilize

23 | a first protocol and wherein said second network (15) is

. 24 | arranged to utilize a second protocol.

Claims 2-4 (cancelled).

1   Claim 5 (previously presented): Method according to
2   claim 1, wherein said computer arrangement is an e-mail
3   server (12).

1   Claim 6 (original): Method according to claim 5, wherein
2   said message is an e-mail message.

1   Claim 7 (previously presented): Method according to
2   claim 1, wherein said second protocol is HTTP.

1   Claim 8 (previously presented): Method according to
2   claim 1, wherein said second wireless network (15) is
3   either GPRS or UMTS.

1   Claim 9 (previously presented): Method according to
2   claim 1, wherein said first wireless network is GSM.

1   Claim 10 (previously presented): Method according
2   to claim 1, comprising establishing an on-line connection
3   between said computer arrangement (12) and said mobile
4   device (17(i)) either automatically by said mobile
5   device (17(i)) or by said mobile device (17(i)) after being
6   instructed to do so by a user of the mobile device (17(i)).

1   Claim 11 (currently amended): Communication system

2   comprising a computer arrangement storing a message in a

3   memory and arranged to transmit said message to a

4   switched-on mobile device (17(i)), said computer

5   arrangement being arranged to:

6   transmit~~ting~~ an alert message from said computer

7   arrangement (12) to said mobile device (17(i))

8   via a first network (19); and

9   transmit~~ting~~ said message from said computer

10   arrangement (12) to said mobile device (17(i))

11   upon request from said mobile device (17(i)) via

12   a second network (15);

13   wherein said first and second networks are ~~parallel~~

14   mobile networks (15, 19) working in parallel;~~.~~

15   wherein the communication system is arranged to

16   establish an on-line connection between said computer

17   arrangement (12) and said mobile device (17(i));

18   wherein said first network (19) is arranged to utilize

19   a first protocol and wherein said second network (15) is

20   arranged to utilize a second protocol;

21   the communication system further comprising a protocol

22   translator (14), wherein said computer arrangement (12) is

23   arranged to send said message to said protocol

24   translator (14) using a third protocol and said protocol

25   translator is arranged to translate said message in said

26   third protocol to a message in said second protocol before

27   transmission to said mobile device (17(i)).

Claims 12-14 (cancelled).

1   Claim 15 (currently amended): Communication system

2   according to claim ~~14~~11, wherein said protocol

3   translator (14) is included in the computer

4   arrangement (12).

1   Claim 16 (currently amended): Communication system

2   according to claim ~~12~~11, wherein said computer arrangement

3   is an e-mail server (12).

1   Claim 17 (original): Communication system according to

2   claim 16, wherein said message is an e-mail stored at the

3   e-mail server (12).

1   Claim 18 (currently amended): Communication system

2   according to claim ~~12~~11, wherein the system comprises a

3   gateway (18) between the computer arrangement (12) and the

4   first and second mobile networks (15, 19).

1   Claim 19 (original): Communication system according to

2   claim 18, wherein, in operation, the computer

3   arrangement (12), upon receiving said message, establishes

4   a PAP message and transmits this PAP message via a PAP

5   protocol to said gateway (18), and the gateway (18), upon

6   receiving said PAP message, generates an SMS message for

7   said mobile device (17(i)) including said alert message.

1   Claim 20 (currently amended): Communication system

2   according to claim ~~12~~11, wherein the system comprises at

3   least one mobile device (17(i)).

1   Claim 21 (original): Communication system according to
2   claim 20, wherein said mobile device (17(i)) is arranged to
3   generate an HTTP get message upon receiving said alert
4   message, either automatically or after having received an
5   instruction to that effect from a user of the mobile
6   device (17(i)).

1   Claim 22 (original): Communication system according to
2   claim 21, wherein said protocol translator (14) is arranged
3   to translate said message to a HTTP reply message.

Claim 23 (cancelled).
